

The Easiest to Use Portable Surface Gaging System

A pocket-sized economically priced, completely portable instrument which performs traceable surface roughness measurements on a wide variety of surfaces; can be used confidently in production, on the shop floor and in the laboratory.

- With one button operation, the original PocketSurf IV is still the best way to get basic surface gaging measurements at the point of manufacture
- Solidly built, with a durable cast aluminum housing, to provide years of accurate, reliable surface finish gaging
- Can be used to measure any one of four, switch selectable, parameters: Ra, Rmax/Ry, Rz
- Review any of the parameters after the measurement is complete
- Selectable traverse length 1, 3 or 5 cut-offs of 0.8 mm / 0.030 in
- Operates in any position – horizontal, vertical, and upside down

A wide selection of stands, accessories and application-specific probes are available

PocketSurf IV complete kit

Order No.	2191800	2191802
Includes	EGH-1019: Probe, 90°, 10 µm Radius, PMD-90101 Certified Specimen, including Test Certificate	EGH-1026: Probe, 90°, 5 µm Radius, PMD-90101 Certified Specimen, including Test Certificate
